

Configuring your email client: Outlook Express

Problem:

Configuring your email client: Outlook Express
Solution:
Configuring your email client: Outlook Express
Open Outlook Express.

- Click the 'Tools' menu, and select 'Accounts.'
- Click 'Add', then select 'Mail.'

- Select 'POP3,' then click 'Next.'

- Setup the Account.

- Enter 'Your Name' as you would like it to appear.
- Enter your 'E-mail Address' in the form of 'username@yourdomain.com' (replace with your e-mail address). If you need to create an email address on Bluehost, [click here](#).
- Enter 'mail.yourdomain.com' (replace yourdomain.com with your domain) in the 'Incoming Mail Server' (POP3) field.
- Enter 'mail.yourdomain.com' (replace yourdomain.com with your domain) in the 'Outgoing Mail Server' (SMTP) field.
- Enter your full e-mail address (in the form of username@yourdomain.com) in the 'User Name' field.
- Enter your password (for the e-mail account, not the password you use to log into the Control Panel) in the 'Password' field.

- Click 'More Settings.'
- Click on the 'Outgoing Server' tab.
- Put a check next to 'My outgoing server (SMTP) requires authentication.' Make sure that 'Use same settings as my incoming mail server' is selected.

- Click 'OK.'
- Click 'Next.'
- Click 'Finish.'

That's it, you're done!
