

How does the web site building process work?

How does the web site building process work?

Here is a summary of the building process.

1. First, you call or send an email and we meet in person or over the phone to discuss any necessary details.
2. Next, you receive a contract. It includes details about the work you want done, prices and payment schedule.
3. Work begins upon reception of the signed contract and the first, non-refundable installment of the payment schedule.
4. Briefly, the work includes reserving your domain name, setting up the host server and completing the first draft of your web site.
5. After the first draft is completed, you review the work and make suggestions for the second draft.
6. Work begins on the second draft upon reception of the second installment.
7. When the second draft is completed, you review the work and make suggestions for the final draft.
8. Revisions for the final draft are then made.
9. Upon approval of the final draft and reception of the last installment, your new web site is uploaded to the host server.
